Full Report

Data: default sample, 48,299 rows from 9,833 customers, 02 Jan 2026 to 30 Mar 2026. Model: Original model. Generated 08 Oct 2026 19:30.

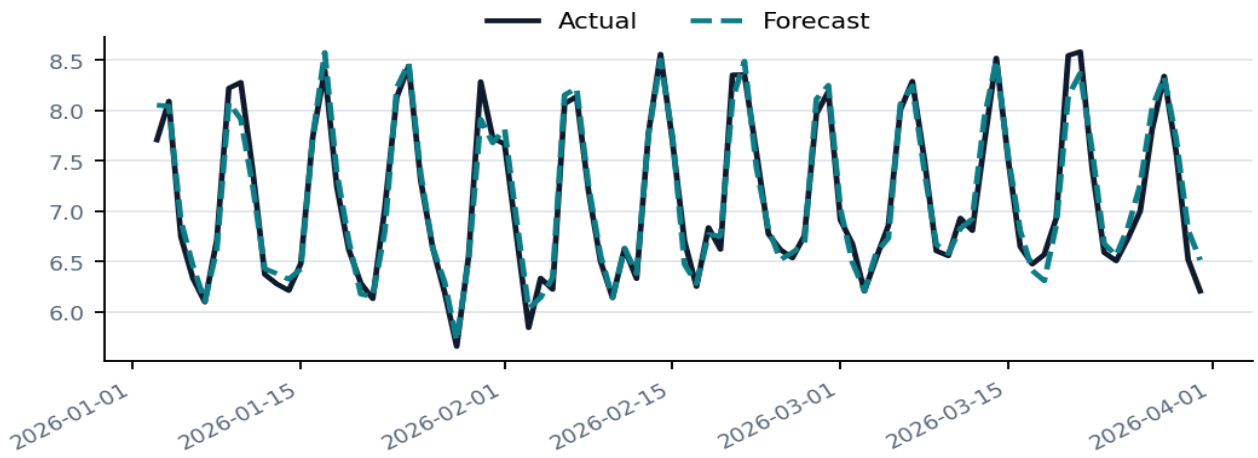

Overview

Total customers	Data per customer per day	Average monthly bill	Customers at churn risk	Next-day forecast
9,833	**7.1 GB** No earlier period	**R 566**	**1,456** 14.8% of customers	**70,285 GB** -1.6% per customer vs last 7 days

Needs attention

• Capacity: Gauteng is forecast to need 40.2% of next-day demand with 40.5% of customers.
• Churn: 1,456 customers have a churn probability of 50% or more. Their bills add up to R 339,439 a month.
• Network: 21.0% of records were on congested networks. Forecasts miss by 2.00 GB there, against 1.97 GB otherwise.
